SIGNIFICANT EVENTS AND TRANSACTIONS

ACCOUNTING POLICIES

In accordance with § 53 (6) of the Exchange Rules for the Frankfurter Wertpapierbörse (FWB), Deutsche Telekom AG voluntarily publishes a quarterly financial report that comprises interim consolidated financial statements and an interim Group management report. The interim consolidated financial statements were prepared in accordance with the International Financial Reporting Standards (IFRSs) applicable to interim financial reporting as adopted by the EU. The interim management report for the Group was prepared in accordance with the German Securities Trading Act (Wertpapierhandelsgesetz – WpHG).

STATEMENT OF COMPLIANCE

The interim consolidated financial statements for the period ended March 31, 2019 have been prepared voluntarily in compliance with International Accounting Standard (IAS) 34. As permitted by IAS 34,

it has been decided to publish a condensed version compared to the consolidated financial statements at December 31, 2018. All IFRSs applied by Deutsche Telekom have been adopted by the European Commission for use within the EU.

In the opinion of the Board of Management, the reviewed quarterly financial report includes all standard adjustments to be applied on an ongoing basis that are required to give a true and fair view of the results of operations and financial position of the Group. Please refer to the notes to the consolidated financial statements as of December 31, 2018 for the accounting policies applied for the Group's financial reporting, 2018 Annual Report, page 153 et seq.

INITIAL APPLICATION OF STANDARDS, INTERPRETATIONS, AND AMENDMENTS IN THE REPORTING PERIOD

Pronouncement	Title	To be applied by Deutsche Telekom from	Changes	Expected impact on the presentation of Deutsche Telekom's results of operations and financial position
IFRS 16	Leases	January 1, 2019	Under IFRS 16, lessees are required to recognize assets and liabilities for all leases and the rights and obligations associated with these leases in the statement of financial position. Lessees are therefore now no longer required to make the distinction between finance and operating leases that was required in the past in accordance with IAS 17. For all leases, the lessee recognizes a lease liability in the statement of financial position for the obligation to make future lease payments. At the same time, the lessee recognizes a right to use the underlying leased asset which is equivalent to the present value of the future lease payments plus initial direct costs, directly attributable expenditure, advance payments and restoration costs, minus incentive payments received. Similar to the guidance on finance leases in the previously applicable provisions of IAS 17, the lease liability will subsequently be adjusted over the lease term to reflect interest on the liability and principal repayments, while the right-of-use asset will be depreciated. Both factors – in contrast to IAS 17 – lead to higher expenses at the beginning of a lease. For the lessor, on the other hand, the provisions of the new standard are similar to the existing guidance in IAS 17. IFRS 16 also includes new provisions on the definition of a lease and its presentation, on disclosures in the notes, and on sale and leaseback transactions.	The standard has a material effect on the presentation of Deutsche Telekom's results of operations and financial position. The effects are detailed in the explanations following this table.
Amendments to IAS 19	Plan Amendment, Curtailment or Settlement	January 1, 2019	The amendments change the guidance on the amendment, curtailment, or settlement of a defined benefit pension plan. They clarify that an entity is required to determine current service cost and the net interest for the remainder of the reporting period after a plan amendment, curtailment, or settlement using updated actuarial assumptions and the net liability (or net asset) at the time of the intervention; any changes in a surplus as part of past service cost or as a gain or loss on settlement must be recognized in profit or loss, even if this surplus had not been previously disclosed due to the effect of the asset ceiling. The effects of changes in the asset ceiling are recognized in other comprehensive income.	No material impact.
Amendments to IAS 28	Long-term Interests in Associates and Joint Ventures	January 1, 2019	The amendments clarify that an entity applies IFRS 9 including its impairment requirements to long-term interests in an associate or joint venture that form part of the net investment in the associate or joint venture but are not accounted for using the equity method.	No material impact.
Amendments to IFRS 9	Prepayment Features with Negative Compensation	January 1, 2019	The amendment sets out that, if certain conditions are met, financial assets can be measured at amortized cost or fair value through other comprehensive income (FVOCI) if, in the case of an early termination, compensation is required to be paid to the party that triggers the early termination of the contract.	No material impact.
IFRIC 23	Uncertainty over Income Tax Treatments	January 1, 2019	IFRIC 23 brings clarity to IAS 12 "Income Taxes" in relation to the recognition and measurement of current income taxes, deferred tax assets, and deferred tax liabilities if there is uncertainty regarding the treatment of income taxes.	No material impact.
Annual Improvements Project	Annual Improvements to IFRSs 2015-2017 Cycle	January 1, 2019	Clarification of many published standards.	No material impact.

In January 2016, the IASB issued IFRS 16 “Leases.” This standard is mandatory for reporting periods beginning on or after January 1, 2019. IFRS 16 has a material effect on Deutsche Telekom’s consolidated financial statements, particularly on total assets, the results of operations, cash generated from operations, net cash from/used for financing activities, and the presentation of the financial position.

The new regulations affect Deutsche Telekom as a lessee especially in relation to leases of cell sites (land, space in cell towers, or rooftop surface areas), network infrastructure, and buildings used for administrative or technical purposes.

Deutsche Telekom has not applied the new lease standard retrospectively in full, but makes use of the exemption provisions for lessees, also known as the modified retrospective method. On the transition to IFRS 16, remaining payment obligations from existing operating leases are discounted using the relevant incremental borrowing rate and recognized as a lease liability. The right-of-use assets were carried as of January 1, 2019 in the amount of the lease liability, adjusted by the amount of the prepaid or accrued lease payments. Due to the significant amount of liabilities from straight-line leases in accordance with IAS 17, which in accordance with IFRS 16 must be deducted from the right-of-use assets, the right-of-use assets as of January 1, 2019 under IFRS 16 were carried at a significantly lower amount than the corresponding lease liability (see Note 16 “Other liabilities,” 2018 Annual Report, page 211). This liability primarily relates to leases for T-Mobile US’ cell sites. As of the transition date of January 1, 2019, in a first step, the lease terms underlying the liabilities were adjusted to the lease terms determined in accordance with IFRS 16. This adjustment increased shareholders’ equity. The remaining accrued lease liability was deducted from the right-of-use asset as described above. In addition to existing operating leases, existing finance leases and their carrying amounts as of December 31, 2018 are recognized as right-of-use assets and lease liabilities as of January 1, 2019.

Significant policy elections and practical expedients are exercised as follows:

- Right-of-use assets and lease liabilities are presented separately in the statement of financial position.
- The recognition, measurement, and disclosure requirements of IFRS 16 also apply to short-term leases and leases of low-value assets.
- Deutsche Telekom elected not to separate non-lease components from lease components, and instead to account for each lease component and any associated non-lease components as a single lease component.
- IAS 38 is applied for leases of intangible assets rather than IFRS 16.

In addition, on the date of first-time adoption of IFRS 16, use was made of the main policy elections and practical expedients as follows:

- Provisions for onerous contracts recognized in connection with leases were adjusted against the right-of-use asset as of January 1, 2019.
- In determining the lease term, hindsight may be used where economic considerations and penalties indicate that it is reasonably certain that options to extend or terminate the lease will be exercised.
- Existing contracts will not be grandfathered. On January 1, 2019, IFRS 16 was therefore applied to all existing contracts falling within its scope. It applies to contracts in which Deutsche Telekom is a lessee and to leases in which the Group is a lessor.

Overall, the new definition of a lease does not have a material impact for Deutsche Telekom as a lessor. However, the number of identified leases changes. The new definition does not affect the contracts for servers or similar hardware provided to customers as part of data and network solutions or contracts for terminal equipment and SmartHome network solutions provided to customers. These will continue to be defined as leases. However, the number of leases for contracts involving modems/routers for the latest generation of devices provided to consumers as part of fixed-network mass-market contracts is decreasing. In relation to services provided in data centers, the leasing of space, for example separate rooms for setting up the customer’s own hardware, is identified as a component of a lease. Furthermore, the leasing of local loop lines and space to wholesale fixed-network customers (e.g., co-location space) is also classified as a lease.

The adjustments made to the consolidated statement of financial position as of January 1, 2019 and attributable to first-time application of IFRS 16 are as follows ^a:

millions of €

	Carrying amount in accordance with IAS 17 Dec. 31, 2018	Remeasurements	Reclassifications	Carrying amount in accordance with IFRS 16 Jan. 1, 2019
ASSETS				
Intangible assets	64,950		(29)	64,921
Property, plant and equipment	50,631		(2,524)	48,107
Right-of-use assets	n.a.	15,601	638	16,239
Other financial assets	4,432		21	4,453
Deferred tax assets	2,949	166		3,115
Other assets	2,234		(196)	2,038
Non-current assets and disposal groups held for sale	145	9		154
LIABILITIES AND SHAREHOLDERS' EQUITY				
LIABILITIES				
Financial liabilities	62,275		(2,481)	59,794
Lease liabilities	n.a.	15,601	2,472	18,073
Other provisions	6,435		(185)	6,250
Deferred tax liabilities	8,240	290		8,530
Other liabilities	3,427	(470)	(1,859)	1,098
Contract liabilities	585		(7)	578
Trade and other payables	10,735		(30)	10,705
Liabilities directly associated with non-current assets and disposal groups held for sale	36	9		45
SHAREHOLDERS' EQUITY				
Retained earnings including carryforwards plus non-controlling interests ^b	(25,462)	346		(25,116)

^a The overview above contains only those items of the statement of financial position that are affected by the first-time application of IFRS 16; for reasons of simplification, current and non-current items have been combined in the presentation.

^b For reasons of simplification, the figure is combined to show the cumulative effect of the transition to IFRS 16 to be recognized directly in equity.

After deferred tax liabilities totaling EUR 0.1 billion (net) were taken into account, the transition to the new standard as of January 1, 2019 resulted in a cumulative effect that increased retained earnings by EUR 0.3 billion and included the effect of shares attributable to non-controlling interests. This largely results from the derecognition of accrued lease payments (liabilities from straight-line leases) described above.

Reclassifications relate in particular to reclassifications of carrying amounts from previous finance leases to right-of-use assets and lease liabilities and the adjustments of prepaid or accrued lease payments from operating leases under the previous accounting method, provisions for onerous contracts, or liabilities from straight-line lease against right-of-use assets, as described above. For more information, please refer to section "Selected notes to the consolidated statement of financial position," page 40 et seq.

The obligations arising from operating leases as of December 31, 2018 (see Note 37 "Leases," 2018 Annual Report, page 232 et seq.) gave rise to the following reconciliation to the opening balance of lease liabilities as of January 1, 2019:

millions of €	Jan. 1, 2019
Obligations arising from operating leases as of December 31, 2018	18,284
Minimum lease payments (nominal value) of finance lease liabilities as of December 31, 2018	2,950
Changes resulting from new definition of leases	(743)
Changes in the assessment of options to extend or terminate the lease	865
Other	(95)
Gross lease liabilities as of January 1, 2019	21,261
Discounting	(3,188)
Lease liabilities as of January 1, 2019	18,073
Present value of finance lease liabilities as of December 31, 2018	(2,472)
ADDITIONAL LEASE LIABILITIES ATTRIBUTABLE TO FIRST-TIME APPLICATION OF IFRS 16 AS OF JANUARY 1, 2019	15,601

If the interest rate implicit in the lease cannot be readily determined, the interest rate used for the measurement of right-of-use assets and lease liabilities is the incremental borrowing rate of interest. The incremental borrowing rate of interest is determined by deriving benchmark interest rates for a period of up to 30 years from maturity-related risk-free interest rates which are increased by a credit-risk premium and adjusted for a liquidity and country-risk premium.

Weighted average incremental borrowing rates applied to lease liabilities recognized in the statement of financial position as of January 1, 2019 of 1.7 to 5.0 percent were used in the euro currency area and 5.2 percent in the U.S. dollar currency area for discounting.

The increase in lease liabilities leads to a corresponding increase in net debt.

The right-of-use assets reported as of March 31, 2019 were as follows:

millions of €	
	Mar. 31, 2019
Right-of-use assets – land and buildings	6,188
Right-of-use assets – land and buildings from sale and leaseback transactions	642
Right-of-use assets – technical equipment and machinery	9,882
Right-of-use assets – other equipment, operating and office equipment	116
	16,828

Right-of-use assets include assets that until December 31, 2018 were included within finance leases and recognized in property, plant and equipment.

This gave rise to the following presentation in the income statement for the first quarter of 2019^a:

millions of €	
	Q1 2019
DEPRECIATION OF RIGHT-OF-USE ASSETS	861
Right-of-use assets – land and buildings	306
Right-of-use assets – land and buildings from sale and leaseback transactions	37
Right-of-use assets – technical equipment and machinery	503
Right-of-use assets – other equipment, operating and office equipment	15
INTEREST EXPENSE ON LEASE LIABILITIES	198

^a The overview above contains only those items that are affected by the first-time application of IFRS 16.

For more information on standards, interpretations, and amendments that have been issued but not yet applied, as well as disclosures on the recognition and measurement of items in the statement of financial position and discretionary decisions and estimation uncertainties, please refer to the section “Summary of accounting policies” in the notes to the consolidated financial statements in the 2018 Annual Report, page 153 et seq.

CHANGES IN ACCOUNTING POLICIES AND CHANGES IN THE REPORTING STRUCTURE

With the exception of the standards, interpretations, and amendments that are effective for the first time in the financial year, Deutsche Telekom did not make any major changes in its accounting policies.

CHANGES IN THE COMPOSITION OF THE GROUP

In the first quarter of 2019, Deutsche Telekom conducted the following transactions, which (will) have an impact on the composition of the Group. Other changes to the composition of the Group not shown here were of no material significance for Deutsche Telekom’s interim consolidated financial statements.

Acquisition of Tele2 Netherlands Holding N.V.

On December 15, 2017, Deutsche Telekom signed an agreement with the Tele2 Group on the acquisition of 100 percent of the shares in the telecommunications provider Tele2 Netherlands Holding N.V. (Tele2 Netherlands) by T-Mobile Netherlands Holding B.V. (T-Mobile Netherlands). After the European Commission issued its approval without conditions on November 27, 2018, the transaction was consummated on January 2, 2019. Tele2 Netherlands has been included in Deutsche Telekom’s consolidated financial statements as a fully consolidated subsidiary since the acquisition date. This transaction will establish a stronger, more sustainable provider of convergent fixed-network and mobile services on the Dutch market.

Consideration totaling EUR 734 million was transferred from the Deutsche Telekom Group to the Tele2 Group at the acquisition date. This consisted of a provisional cash payment (taking purchase price adjustments into account) of EUR 234 million and the transfer of a 25 percent share in T-Mobile Netherlands (prior to the business combination) that was measured at a fair value of EUR 500 million. As a consequence of this transaction, Deutsche Telekom now recognizes non-controlling interests of 25 percent in the combined company resulting from the aforementioned transfer of 25 percent of the shares in T-Mobile Netherlands (prior to the business combination) and the non-controlling interests in Tele2 Netherlands.

The purchase price allocation and the measurement of Tele2 Netherlands’ assets and liabilities at the acquisition date were nearly finalized by March 31, 2019. The fair values of Tele2 Netherlands’ acquired assets and liabilities recognized at the acquisition date are presented in the following table:

Fair values at the acquisition date

millions of €

ASSETS	
CURRENT ASSETS	286
Cash and cash equivalents	4
Trade and other receivables	238
Contract assets	7
Other assets	20
Inventories	17
NON-CURRENT ASSETS	1,123
Goodwill	203
Other intangible assets	455
Of which: customer base	210
Of which: spectrum licenses	182
Of which: other	63
Property, plant and equipment	286
Right-of-use assets	171
Other assets	8
ASSETS	1,409
LIABILITIES	
CURRENT LIABILITIES	261
Lease liabilities	79
Trade and other payables	97
Other provisions	56
Contract liabilities	10
Other liabilities	19
NON-CURRENT LIABILITIES	169
Lease liabilities	118
Other provisions	17
Deferred tax liabilities	29
Contract liabilities	5
LIABILITIES	430

Deutsche Telekom has measured the non-controlling interests in the acquiree at fair value. This means that the full-goodwill method has been used.

The preliminary acquired goodwill of EUR 203 million to be recognized in Deutsche Telekom's consolidated statement of financial position is calculated as follows:

Fair values at the acquisition date

millions of €

Consideration transferred	734
+ non-controlling interests	245
– fair value of the acquired assets	(1,206)
+ fair value of the acquired liabilities	430
= GOODWILL	203

The goodwill comprises the value of expected synergies arising from the acquisition, expected new customer gains and the value of the assembled workforce. None of the goodwill recognized is expected to be deductible for income tax purposes.

The spectrum licenses were measured using the guideline transaction method, with the fair value being derived on the basis of the price analyses used in the spectrum auctions carried out in the European telecommunications industry. The spectrum licenses are amortized over the expected useful life of 10 to 11 years. The customer base was measured using the multi-period excess earnings method. Under this method, the fair value of the customer base is determined by calculating the present value of profit/loss after taxes that can be assigned to the existing customers. The customer base is amortized over the useful life of 5 to 15 years.

The carrying amounts of the acquired receivables are based on the fair values. The gross amounts of the receivables amount to EUR 279 million. No material contingent liabilities have been identified.

The deferred tax liability comprises the tax effect on the temporary differences between the fair value of the different assets and the respective carrying value for tax purposes.

No material transaction-based costs were incurred by March 31, 2019.

Deutsche Telekom's net revenue increased by EUR 51 million in the reporting period due to the acquisition of Tele2 Netherlands. Deutsche Telekom's net profit in the reporting year includes loss before taxes of EUR 14 million from Tele2 Netherlands. Since the business combination took place before the beginning of the 2019 financial year, net revenue and net profit would not have been other than as reported.

The following transactions is expected to change the composition of the Deutsche Telekom Group in future:

Agreed business combination of T-Mobile US and Sprint

Together with their respective majority shareholders Deutsche Telekom AG and Softbank K.K., T-Mobile US and Sprint Corp. concluded a binding agreement on April 29, 2018 to combine their companies. Under the agreement, T-Mobile US will acquire all of the shares in Sprint. In return for every 9.75 Sprint shares, the company's shareholders will receive one new T-Mobile US share without any additional cash contribution. On completion of the transaction, Deutsche Telekom will hold around 42 percent of T-Mobile US' shares and Softbank around 27 percent, while the free float will account for about 31 percent. Due to the voting-rights agreement with Softbank, and to the fact that individuals nominated by Deutsche Telekom will hold the majority of the seats on the new company's Board of Directors, T-Mobile US will continue to be included as a fully consolidated subsidiary in the consolidated financial statements. The larger T-Mobile US is expected to achieve cost and capital expenditure synergies with a net present value of around USD 43 billion (after integration costs). Around USD 15 billion has been budgeted for integration costs. The agreement is subject to approval by the authorities as well as other closing conditions.

Agreed sale of Telekom Albania

On January 15, 2019, OTE concluded an agreement concerning the sale of its stake in Telekom Albania to the Bulgarian company Albania Telecom Invest AD for a purchase price of EUR 50 million. The transaction is subject to approval by the authorities as well as other closing conditions and is expected to be completed in the first half of 2019. The assets and liabilities of Telekom Albania, which is reported in the Europe operating segment, are consequently presented under non-current assets and disposal groups held for sale.

OTHER TRANSACTIONS THAT HAD NO EFFECT ON THE COMPOSITION OF THE GROUP

OTE share buy-back

As a consequence of a share buy-back program implemented in 2018, OTE held a total of 10,211,070 treasury shares with an aggregate value of EUR 109 million as of December 31, 2018. The extraordinary shareholders' meeting of OTE S.A. on December 19, 2018 resolved to withdraw 10,211,070 shares from circulation with a corresponding capital reduction of EUR 29 million. The shares were retired from the Athens Stock Exchange on February 19, 2019. As a result, Deutsche Telekom's share in the OTE group increased from 45.00 to 45.96 percent.

Resolution on T-Mobile US' share buy-back program in the event of the termination of the agreement with Sprint

On April 27, 2018, T-Mobile US' Board of Directors authorized an increase in the total share buy-back program to up to USD 9.0 billion, consisting of the USD 1.5 billion in repurchases already executed and for up to an additional USD 7.5 billion of T-Mobile US common stock until the end of 2020. The additional buy-back authorization is contingent upon the termination of the business combination agreement with Sprint.

SELECTED NOTES TO THE CONSOLIDATED STATEMENT OF FINANCIAL POSITION

TRADE AND OTHER RECEIVABLES

At EUR 10.0 billion, trade and other receivables remained at the 2018 year-end level. Higher trade receivables in our Group Development operating segment amounting to EUR 0.2 billion, mainly from the acquired Tele2 Netherlands, offset declining volumes of receivables in the Europe, Germany, and Systems Solutions operating segments. Exchange rate effects, primarily from the translation from U.S. dollars into euros, increased the carrying amount slightly.

CONTRACT ASSETS

Contract assets arise from the application of IFRS 15 since the 2018 financial year. In prior periods, under IFRS 15, these would have led to the earlier recognition of revenue, in particular from the sale of goods and merchandise. Receivables from long-term construction contracts continue to be recognized under contract assets. At EUR 1.8 billion, contract assets remained level with the December 31, 2018 figure.

INVENTORIES

Compared with December 31, 2018, inventories were EUR 0.2 billion higher at EUR 2.0 billion, due primarily to an increase in inventories of higher-priced smartphones in the United States operating segment.

INTANGIBLE ASSETS AND PROPERTY, PLANT AND EQUIPMENT

Intangible assets increased by EUR 1.4 billion to EUR 66.4 billion. Additions totaling EUR 1.1 billion increased the carrying amount. They mainly comprised capital expenditures in the United States and Europe operating segments and in the Group Headquarters & Group Services segment. Changes in the composition of the Group increased the carrying amount by a further EUR 0.7 billion. The acquisition of Tele2 Netherlands in the Group Development operating segment resulted in identifiable intangible assets totaling EUR 0.5 billion at the acquisition date (including a customer base and existing spectrum licenses) in addition to goodwill of EUR 0.2 billion. Positive exchange rate effects, primarily from the translation of U.S. dollars into euros, increased the carrying amount by EUR 0.8 billion. Depreciation charges reduced the carrying amount by EUR 1.2 billion.

Property, plant and equipment decreased by EUR 1.9 billion compared with December 31, 2018 to EUR 48.8 billion. EUR 2.5 billion of the decrease is due to the effect of the mandatory first-time application of IFRS 16 "Leases" as of January 1, 2019. Assets arising from finance leases that were reported under property, plant and equipment until December 31, 2018, for which Deutsche Telekom as the lessee bore substantially all the risks and rewards associated with the lease, are now recognized as rights to use the underlying leased assets. For more information on the application of the new accounting standard, please refer to the section "Accounting policies," page 35 et seq. Depreciation and amortization of EUR 2.2 billion and disposals of EUR 0.1 billion also reduced the carrying amount. Additions of EUR 2.4 billion – especially to upgrade and build out the network in our United States operating segment and in connection with the broadband/fiber-optic rollout, the IP transformation, and mobile infrastructure in the Germany and Europe operating segments – increased the carrying amount. Effects of changes in the composition of the Group resulting from the acquisition of Tele2 Netherlands increased the carrying amount by EUR 0.3 billion. Positive exchange rate effects, primarily from the translation of U.S. dollars into euros, increased the carrying amount by EUR 0.3 billion.

RIGHT-OF-USE ASSETS

As a consequence of the mandatory first-time application of IFRS 16 "Leases" as of January 1, 2019, the rights to use the underlying leased assets were recognized in the amount of the lease liability, adjusted by the amount of the prepaid or accrued lease payments. The remeasurement and reclassification effect reported amounted to EUR 16.2 billion as of January 1, 2019. This includes both rights to use lease assets recognized in the statement of financial position for the first time and rights to use assets arising from finance leases in the amount of EUR 2.5 billion that were previously recognized under property, plant and equipment. For more information on the application of the new accounting standard please refer to the section "Accounting policies," page 35 et seq. As of March 31, 2019, the carrying amount increased to EUR 16.8 billion. Depreciation and amortization of EUR 0.9 billion was recognized in the first quarter of 2019.

CAPITALIZED CONTRACT COSTS

Capitalized contract costs arise from the application of IFRS 15 since January 1, 2018. Capitalized contract assets increased by EUR 0.1 billion as of March 31, 2019 to EUR 1.8 billion, mainly due to a higher level of capitalized costs of obtaining a contract, in particular in the United States operating segment.

TRADE AND OTHER PAYABLES

Trade and other payables decreased by EUR 0.5 billion to EUR 10.2 billion due to the reduction in the level of liabilities, mainly in the Europe and Germany operating segments. This was contrasted by an increase in liabilities in the United States operating segment, due in part to the building up of inventories of higher-priced smartphones as well as slightly positive exchange rate effects.

OTHER LIABILITIES

Current and non-current other liabilities decreased by EUR 1.8 billion to EUR 4.2 billion. This is mainly attributable to the fact that, as a consequence of the first-time application of IFRS 16, liabilities from straight-line leases, mainly for cell sites, in the United States operating segment were no longer required to be reported. As of January 1, 2019, first of all, the lease terms underlying these liabilities were adjusted to the lease terms determined in accordance with IFRS 16, increasing shareholders' equity, and the remaining prepaid expense was offset against the right-of-use asset. This reduced other liabilities by EUR 2.2 billion as of the transition date. For more information on the application of the new accounting standard, please refer to the section "Accounting policies," page 35 et seq.

FINANCIAL LIABILITIES

Current and non-current financial liabilities increased by EUR 3.7 billion to EUR 65.9 billion compared with the end of 2018.

On March 28, 2019, the shareholders' meeting of Deutsche Telekom AG resolved in accordance with the proposal by the Board of Management on the appropriation of net income to pay a dividend of EUR 0.70 for each no par value share carrying dividend rights. This resulted in a total dividend payment of EUR 3.3 billion. As of March 31, 2019, current financial liabilities increased accordingly. The dividend was paid to shareholders at the beginning of April 2019.

In addition, the following borrowings or repayments of debt were made:

In the first quarter of 2019, Deutsche Telekom AG issued euro bonds with a total volume of EUR 1.8 billion and pound sterling bonds with a total volume of GBP 0.4 billion (EUR 0.5 billion). Scheduled repayments of promissory notes in the amount of EUR 0.2 billion in the first quarter of 2019 had an offsetting effect. The net change of EUR 0.5 billion in commercial paper and net short-term borrowings of EUR 0.6 billion also reduced the carrying amount of the financial liabilities.

An increase in the carrying amount of the financial liabilities compared with December 31, 2018 of around EUR 0.2 billion in total relates to exchange rate effects in the United States operating segment.

The mandatory first-time application of IFRS 16 as of January 1, 2019 resulted in finance lease liabilities being reclassified from financial liabilities to lease liabilities. Based on the carrying amounts as of December 31, 2018, this reclassification reduced the financial liabilities by EUR 2.5 billion. For more information on the application of the new accounting standard, please refer to the section "Accounting policies," page 35 et seq.

The following table shows the composition and maturity structure of financial liabilities as of March 31, 2019:

millions of €

	Mar. 31, 2019	Due within 1 year	Due >1 ≤ 5 years	Due > 5 years
Bonds and other securitized liabilities	51,835	6,249	17,102	28,483
Liabilities to banks	5,561	1,795	2,387	1,379
Liabilities to non-banks from promissory note bonds	344	0	53	291
Other interest-bearing liabilities	2,317	1,551	566	200
Other non-interest-bearing liabilities	4,720	4,616	98	5
Derivative financial liabilities	1,170	746	105	318
FINANCIAL LIABILITIES	65,947	14,958	20,311	30,677

LEASE LIABILITIES

The mandatory first-time application of IFRS 16 as of January 1, 2019 led to the recognition of current and non-current lease liabilities totaling EUR 18.1 billion. These also include the finance lease liabilities that used to be reported under financial liabilities. The carrying amount of the recognized lease liabilities increased to EUR 18.7 billion as of March 31, 2019. Overall, lease liabilities in the amount of EUR 4.1 billion are due within one year. For more information on the application of the new accounting standard, please refer to the section "Accounting policies," page 35 et seq.

CONTRACT LIABILITIES

Contract liabilities arise from the application of IFRS 15 since January 1, 2018. Compared with March 31, 2019, the carrying amount of current and non-current contract liabilities decreased by EUR 0.1 billion to EUR 2.2 billion. These mainly comprise deferred revenues.

PROVISIONS FOR PENSIONS AND OTHER EMPLOYEE BENEFITS

Provisions for pensions and other employee benefits increased from EUR 5.5 billion as of December 31, 2018 to EUR 5.8 billion, mainly due to interest rate adjustments which resulted in an actuarial loss of EUR 0.2 billion to be recognized directly in equity.

As of March 31, 2019, Deutsche Telekom changed the method it uses to calculate the discount rate in the euro zone, Switzerland, and the United Kingdom for determining pension obligations in accordance with IAS 19. The discount rate continues to be determined based on the yields of high-quality European corporate bonds with an AA rating, mapped in a yield curve showing the corresponding spot rates. The changes result from a change in provider for the determination of the yield curves.

Under the new method, adjustments are made in relation to the selection of the bonds available on the market (previous data basis: Bloomberg; data basis after adjustment: Thomson Reuters) as well as in the determination of the yield curve from this data. The first step is to remove bonds with special options (e.g., put or call options) or other properties (e.g., low-volume bonds, bundled bonds, bonds pertaining to a specific country) from the available portfolio. Then a regression curve is determined based on the bond market so as to identify potential outliers (calculated using the double standard deviation) and likewise remove these from the bond portfolio for determining the interest rate. The yield curve determined using this method is subsequently applied to the cash flows in the pension plans so as to determine an equivalent uniform discount rate.

The Group's pension obligations are based on pension commitments mainly in Germany, Greece, and Switzerland. Without the change, the discount rate would be 0.15 percentage points lower in Germany, 0.13 percentage points lower in Greece, and 0.03 percentage points lower in Switzerland, and the defined benefit obligations would be EUR 211 million higher.

SHAREHOLDERS' EQUITY

Shareholders' equity decreased by EUR 0.7 billion as of December 31, 2018 to EUR 42.8 billion, due in particular to the resolved dividend of EUR 3.3 billion paid out by Deutsche Telekom AG. The subsequent measurement of equity instruments directly in equity and the remeasurement of defined benefit plans reduced the carrying amount by EUR 0.2 billion in each case. By contrast, the profit of EUR 1.3 billion increased shareholders' equity. The transition to the IFRS 16 accounting standard likewise increased the carrying amount. The cumulative effect of this was an increase of EUR 0.3 billion in retained earnings (including shares attributable to non-controlling interests) recognized directly in equity as of January 1, 2019. Currency translation effects of EUR 0.5 billion recognized directly in equity and capital increases from share-based payments of EUR 0.1 billion increased shareholders' equity. Shareholders' equity increased as a result of the acquisition of Tele2 Netherlands in the Group Development operating segment which led to transactions with owners totaling EUR 0.5 billion and effects of changes in the composition of the Deutsche Telekom Group of EUR 0.2 billion. For more information, please refer to the section "Changes in the composition of the Group," page 38 et seq.

SELECTED NOTES TO THE CONSOLIDATED INCOME STATEMENT

NET REVENUE

Net revenue breaks down into the following revenue categories:

millions of €	Q1 2019	Q1 2018 ^b
Revenue from the rendering of services	15,849	14,769
Germany	4,328	4,372
United States	7,495	6,484
Europe	2,408	2,364
Systems Solutions	1,241	1,300
Group Development	361	235
Group Headquarters & Group Services	16	15
Revenue from the sale of goods and merchandise^a	3,136	2,769
Germany	503	498
United States	2,161	1,827
Europe	345	353
Systems Solutions	32	22
Group Development	95	69
Group Headquarters & Group Services	0	0
Revenue from the use of entity assets by others	503	386
Germany	205	117
United States	140	145
Europe	55	10
Systems Solutions	6	10
Group Development	65	72
Group Headquarters & Group Services	32	33
NET REVENUE	19,488	17,924

^a Revenue from the sale of goods and merchandise includes interest income of EUR 0.1 billion in the reporting period, calculated using the effective interest method (Q1 2018: EUR 0.1 billion). This income is primarily attributable to accrued interest on receivables in connection with handsets sold under installment plans in the United States operating segment.

^b Prior-year figures were adjusted on account of a change in the allocation between revenue categories. This change relates to revenue from the use of entity assets by others of EUR 72 million in the Group Development operating segment that had been reported under revenue from the rendering of services in the consolidated financial statements for January 1 to March 31, 2018.

For details of changes in net revenue, please refer to the section "Development of business in the Group" in the interim Group management report, page 11 et seq.

OTHER OPERATING INCOME

millions of €	Q1 2019	Q1 2018
Income from the reversal of impairment losses on non-current assets	0	2

Miscellaneous other operating expenses include a large number of individual items accounting for marginal amounts.

DEPRECIATION, AMORTIZATION AND IMPAIRMENT LOSSES

At EUR 4.2 billion, depreciation, amortization and impairment losses on intangible assets, property, plant and equipment, and right-of-use assets were EUR 1.1 billion higher than in the prior-year period. Of this figure, EUR 0.9 billion was attributable to the depreciation charge for right-of-use assets required to be recognized for the first time in accordance with IFRS 16. In the prior-year period, by contrast, expenses had been recognized under goods and services purchased in connection with operating leases as well as depreciation of finance lease assets recognized as property, plant and equipment. Depreciation of property, plant and equipment and amortization of intangible assets were EUR 0.2 billion higher than in the prior year, mainly due to the consistently high investment volume in past years.

PROFIT/LOSS FROM FINANCIAL ACTIVITIES

The loss from financial activities remained stable against the first quarter of 2018 at EUR 0.4 billion. Finance costs increased by EUR 0.2 billion to EUR 0.6 billion. These result in particular from the subsequent measurement of lease liabilities recognized since the application of IFRS 16. By contrast, other financial income/expense improved by EUR 0.2 billion, mainly due to positive measurement effects from embedded derivatives at T Mobile US. In the prior-year period, these had a negative effect of EUR 0.1 billion on other financial income/expense. For more information, please refer to the disclosures on financial instruments, page 46 et seq.

INCOME TAXES

A tax expense of EUR 0.5 billion was recognized in the first quarter of 2019. The effective tax rate of 28 percent essentially reflects the shares of the different countries in the profit before income taxes and their respective national tax rates. In the prior-year period, tax expense in approximately the same amount arose with a profit before income taxes that was just marginally lower.

OTHER DISCLOSURES

NOTES TO THE CONSOLIDATED STATEMENT OF CASH FLOWS

NET CASH FROM OPERATING ACTIVITIES

Net cash from operating activities increased by EUR 1.7 billion year-on-year to EUR 6.0 billion. In the first quarter of 2018, the cash outflows in connection with operating leases reduced net cash from operating activities. Due to the mandatory first-time application of the IFRS 16 accounting standard, the principal repayment portion of lease payments is presented in net cash used in/from financing activities. The strong performance of the United States operating segment significantly increased net cash from operating activities. Factoring agreements – especially in the Systems Solutions operating segment – resulted in positive effects of EUR 0.3 billion on net cash from operating activities in the reporting period. The effect from factoring agreements in the prior-year period also totaled EUR 0.3 billion. In addition, in the prior-year period, dividends received in the amount of EUR 0.2 billion had had an increasing effect. Net cash from operating activities was also reduced by EUR 0.1 billion higher net interest payments.

NET CASH USED IN INVESTING ACTIVITIES

	(3,597)	(3,643)

^a Includes, in addition to the purchase price of EUR 234 million, inflows of cash and cash equivalents in the amount of EUR 4 million.

^b Includes, in addition to the purchase price of EUR 255 million, inflows of cash and cash equivalents in the amount of EUR 2 million.

^c Relates primarily to outflows of cash and cash equivalents in connection with the transfer of the stake in BT as plan assets to Deutsche Telekom Trust e.V. in March 2018.

Cash capex increased by EUR 0.7 billion to EUR 3.8 billion. In the reporting period, mobile spectrum licenses were acquired for total cash of EUR 0.1 billion, primarily in the United States operating segment. The prior-year figure likewise included a total of EUR 0.1 billion for the acquisition of mobile spectrum licenses, also predominantly for the United States operating segment. The increase of EUR 0.6 billion in cash capex compared with the prior-year period is attributable to the United States operating segment and is mainly due to the infrastructure build-out for the 600 MHz spectrum, laying the groundwork for 5G.

NON-CASH TRANSACTIONS IN THE CONSOLIDATED STATEMENT OF CASH FLOWS

In the first quarter of 2019, Deutsche Telekom chose financing options totaling EUR 0.2 billion under which the payments for trade payables from operating and investing activities primarily become due at a later point in time by involving banks in the process (Q1 2018: EUR 0.2 billion). These payables will subsequently be recognized under financial liabilities in the statement of financial position. As soon as the payments have been made, they are disclosed under net cash used in/from financing activities.

In the first quarter of 2019, Deutsche Telekom hired network equipment for a total of EUR 1.1 billion that is classified as a lease in accordance with IFRS 16 (Q1 2018: finance lease in the amount of EUR 0.2 billion). The finance lease is subsequently also presented under lease liabilities in the statement of financial position. Future repayments of the liabilities will be recognized in net cash used in/from financing activities.

Consideration for the acquisition of broadcasting rights will be paid by Deutsche Telekom in accordance with the terms of the contract on the date of its conclusion or spread over the term of the contract. Financial liabilities of EUR 0.1 billion were recognized in the first quarter of 2019 for future consideration for acquired broadcasting rights (Q1 2018: EUR 0.1 billion). As soon as the payments have been made, they are disclosed under net cash used in/from financing activities.

In the United States operating segment, EUR 0.1 billion was recognized for mobile handsets under property, plant and equipment in the reporting period (Q1 2018: EUR 0.3 billion). These relate to the JUMP! On Demand business model at T-Mobile US, under which customers do not purchase the devices but lease them. The payments are presented under net cash from operating activities.

As part of the acquisition of 100 percent of the shares in Tele2 Netherlands N.V., Deutsche Telekom transferred a 25 percent share in T-Mobile Netherlands (prior to the business combination). For more information, please refer to the section "Changes in the composition of the Group," page 38 et seq.

SEGMENT REPORTING

The following table gives an overall summary of Deutsche Telekom's operating segments and the Group Headquarters & Group Services segment for the first quarters of 2019 and 2018.

The acquisition of 100 percent of the shares in the telecommunications provider **Tele2 Netherlands Holding N.V.** by T-Mobile Netherlands Holding B.V. was consummated on January 2, 2019. Since the acquisition date, Tele2 Netherlands has been allocated to the Group Development operating segment and included in Deutsche Telekom's consolidated financial statements as a fully consolidated subsidiary.

In accordance with the Company's own principles of segment management, when loans with embedded derivatives are granted internally to Group entities, the derivative component is recognized separately in the creditor company's financial statements and measured at fair value through profit or loss.

For details on the development of operations in the operating segments and the Group Headquarters & Group Services segment, please refer to the section "Development of business in the operating segments" in the interim Group management report, page 16 et seq.

CONTINGENT LIABILITIES

This section provides additional information and explains recent changes in the contingent liabilities as described in the consolidated financial statements for the 2018 financial year.

Lawsuits filed by partnering publishers of telephone directories. In the lawsuits filed by the partnering publishers of telephone directories, two of the suits suspended in the first instance were withdrawn after the already reported ruling of the Federal Court of Justice in January 2019 went in favor of Deutsche Telekom. As a result, ten proceedings are still pending with a total claim of approximately EUR 70 million plus interest. For nine of these suits, appeal proceedings are still in process with the German Federal Court of Justice while the tenth remains suspended. Proceedings before the administrative court were also brought to a close after the remaining two plaintiffs withdrew their respective suits.

Claims for damages against Slovak Telekom following a European Commission decision to impose fines. On February 21, 2019, Slovak Telekom and Deutsche Telekom filed an appeal with the European Court of Justice against the ruling by the General Court of the European Union of December 13, 2018 in which the fines imposed by the European Commission were partially overturned and the level of the fines reduced.

OTHER FINANCIAL OBLIGATIONS

The following table provides an overview of Deutsche Telekom's other financial obligations as of March 31, 2019:

millions of €

	Mar. 31, 2019
Purchase commitments regarding property, plant and equipment	4,506
Purchase commitments regarding intangible assets	451
Firm purchase commitments for inventories	3,627
Other purchase commitments and similar obligations	17,952
Payment obligations to the Civil Service Pension Fund	2,139
Obligations from the acquisition of interests in other companies	23,595
Miscellaneous other obligations	53
	52,323

Obligations from the acquisition of interests in other companies mainly relate to the agreed business combination of T-Mobile US and Sprint at USD 26.5 billion (EUR 23.6 billion). For further information on agreed corporate transactions, please refer to the section "Changes in the composition of the Group," page 38 et seq., and to the section "Summary of accounting policies – Changes in the composition of the Group and other transactions," 2018 Annual Report, page 176 et seq.

Trade receivables include receivables amounting to EUR 1.9 billion (December 31, 2018: EUR 1.7 billion) due in more than one year. The fair value generally equals the carrying amount.

Financial instruments measured at fair value

When determining the fair value, it is important to maximize the use of current inputs observable in liquid markets for the financial instrument in question and minimize the use of other inputs (e.g., historical prices, prices for similar instruments, prices on illiquid markets). A three-level measurement hierarchy is defined for these purposes. If prices quoted in liquid markets are available at the reporting date for the respective financial instrument, these will be used unadjusted for the measurement (Level 1 measurement). Other input parameters are then irrelevant for the

measurement. One such example is shares and bonds that are actively traded on a stock exchange. Even if quoted prices on liquid markets are not available at the reporting date for the respective financial instrument, the instrument can be measured using other inputs that are observable on the market at the reporting date (Level 2 measurement). The conditions for this are that no major adjustments have been made to the observable inputs and no unobservable inputs are used. Examples of Level 2 measurements are collateralized interest rate swaps, currency forwards, and cross-currency swaps that can be measured using current interest rates or exchange rates. If the conditions for a Level 1 or Level 2 measurement are not met, a Level 3 measurement is applied. In such cases, major adjustments must be made to observable inputs or unobservable inputs must be used.

Of the equity instruments measured at fair value through other comprehensive income and recognized under other financial assets, the instruments presented in the different levels constitute separate classes of financial instruments. In each case, the fair values of the total volume of equity instruments recognized as Level 1 are the price quotations at the reporting date.

The listed bonds and other securitized liabilities are assigned to Level 1 or Level 2 depending on the market liquidity of the relevant instrument. Consequently, issues denominated in euros or U.S. dollars with relatively large nominal amounts are to be classified as Level 1, the rest as Level 2. The fair values of the instruments assigned to Level 1 equal the nominal amounts multiplied by the price quotations at the reporting date. The fair values of the instruments assigned to Level 2 are calculated as the present values of the payments associated with the debts, based on the applicable yield curve and Deutsche Telekom's credit spread curve for specific currencies.

The fair values of liabilities to banks, liabilities to non-banks from promissory notes, and other interest-bearing liabilities are calculated as the present values of the payments associated with the debts, based on the applicable yield curve and Deutsche Telekom's credit spread curve for specific currencies.

Since there are no market prices available for the derivative financial instruments in the portfolio assigned to Level 2 due to the fact that they are not listed on the market, the fair values are calculated using standard financial valuation models, based entirely on observable inputs. The fair value of derivatives is the price that Deutsche Telekom would receive or have to pay if the financial instrument were transferred at the reporting date. Interest rates of contractual partners relevant as of the reporting date are used in this respect. The middle rates applicable as of the reporting date are used as exchange rates. In the case of interest-bearing derivatives, a distinction is made between the clean price and the dirty price. In contrast to the clean price, the dirty price also includes the interest accrued. The fair values carried correspond to the full fair value or the dirty price.

The equity instruments measured at fair value through other comprehensive income contain a large number of investments in strategic, unlisted individual positions. Deutsche Telekom considers the chosen measurement through other comprehensive income without recycling to profit or loss to be appropriate because there are no plans to use the investments for short-term profit-taking. At the date of disposal of an investment, the total cumulative gain or loss is reclassified to retained earnings. Acquisitions and disposals are based on business policy investment decisions.

Development of the carrying amounts of the financial assets and financial liabilities assigned to Level 3

millions of €

	Equity instruments at fair value through other comprehensive income	Derivative financial assets at fair value through profit or loss: termination rights embedded in bonds issued	Derivative financial assets at fair value through profit or loss: energy forward agreements embedded in contracts	Derivative financial liabilities at fair value through profit or loss: energy forward agreements embedded in contracts

Increases in fair value recognized directly in equity	15	0	0	0
Disposals	(3)	0	0	0
Currency translation effects recognized directly in equity	0	4	0	(1)
CARRYING AMOUNT AS OF MARCH 31, 2019	373	327	8	(92)

The equity instruments assigned to Level 3 that are measured at fair value through other comprehensive income and carried under other financial assets are equity investments with a carrying amount of EUR 369 million measured using the best information available at the reporting date. As a rule, Deutsche Telekom considers transactions involving shares in those companies to have the greatest relevance. Transactions involving shares in comparable companies are also considered. The proximity of the relevant transaction to the reporting date, and the question of whether it was conducted at arm's length, are relevant for deciding which information is used for the measurement. Furthermore, the degree of similarity between the object being measured and comparable companies must be taken into consideration. Based on Deutsche Telekom's own assessment, the fair values of the equity investments at the reporting date could be determined with sufficient reliability. Please refer to the table above for the development of the carrying amounts in the reporting period. At the reporting date, investments with a carrying amount of EUR 35 million were held for sale, while there were no plans to sell the remaining investments. In the case of investments with a carrying amount of EUR 255 million, transactions involving shares in these companies took place at arm's length sufficiently close to the reporting date, which is why the share prices agreed in the transactions were to be used without adjustment for the measurement as of March 31, 2019. In the case of investments with a carrying amount of EUR 81 million, an analysis of operational indicators (especially revenue, EBIT and liquidity) revealed that the carrying amounts were equivalent to current fair values. Due to better comparability, previous arm's-length transactions involving shares in these companies are preferable to more recent transactions involving shares in similar companies. In the case of investments with a carrying amount of EUR 33 million, for which the last arm's length transactions relating to shares in these companies took place some time ago, a measurement performed more recently relating to shares in similar companies provides the most reliable representation of the fair values. Here, multiples to the reference variable of expected revenue (ranging between 3.2 and 11.2) were taken. The 25 percent quantile, the median, or the 75 percent quantile was used for the multiples depending on the specific circumstances. If other values had been used for the multiples and for the expected revenue amounts, the fair values calculated would have been

different. These hypothetical deviations (sensitivities) are shown in the table on the right. In addition, non-material individual items with a carrying amount of EUR 4 million are included with differences in value of minor relevance.

The derivatives without a hedging relationship assigned to Level 3 and carried under derivative financial assets relate to options embedded in bonds issued by T-Mobile US with a carrying amount of EUR 327 million when translated into euros. The options, which can be exercised by T-Mobile US at any time, allow early redemption of the bonds at fixed exercise prices. Observable market prices are available regularly and also at the reporting date for the bonds as entire instruments, but not for the options embedded therein. The termination rights are measured using an option pricing model. Historical interest rate volatilities of bonds issued by T-Mobile US and comparable issuers are used for the measurement because these provide a more reliable estimate at the reporting date than current market interest rate volatilities. The absolute figure used for the interest rate volatility at the current reporting date was between 1.2 and 2.1 percent. The spread curve, which is also unobservable, was derived on the basis of current market prices of bonds issued by T-Mobile US and debt instruments of comparable issuers. The spreads used at the current reporting date were between 1.9 and 2.8 percent for the maturities of the bonds and between 0.4 and 1.7 percent for shorter terms. For the mean reversion input, which is likewise unobservable, 10 percent was used. In our opinion, the values used constitute the best estimate in each case. If other values had been used for interest rate volatility, spread curve or mean reversion, the fair values calculated would have been different. These hypothetical deviations (sensitivities) are shown in the table on the right. In the reporting period, net income of EUR 224 million when translated into euros was recognized under Level 3 in other financial income/expense for unrealized gains for the options in the portfolio at the reporting date. For the development of the carrying amounts in the reporting period, please refer to the table above. The changes in value recognized in profit or loss in the reporting period were mainly attributable to fluctuations in the interest rates and historical interest rate volatilities in absolute terms that are relevant for measurement. Due to their distinctiveness, these instruments constitute a separate class of financial instruments.

Sensitivities^a of the carrying amounts of the financial assets and financial liabilities assigned to Level 3 depending on unobservable inputs

millions of €

	Equity instruments at fair value through other comprehensive income	Derivative financial assets at fair value through profit or loss: termination rights embedded in bonds issued	Derivative financial assets at fair value through profit or loss: energy forward agreements embedded in contracts	Derivative financial liabilities at fair value through profit or loss: energy forward agreements embedded in contracts
Multiple next-level-up quantile	5			
Multiple next-level-down quantile	(5)			
Expected revenues +10%	2			
Expected revenues -10%	(2)			
Interest rate volatility ^b +10 %		21		
Interest rate volatility ^b -10 %		(24)		
Spread curve ^c +100 basis points		(140)		
Spread curve ^c -100 basis points		213		
Mean reversion ^d +100 basis points		(5)		
Mean reversion ^d -100 basis points		6		
Future energy prices +10 %			15	36
Future energy prices -10 %			(15)	(36)
Future energy output +5 %			5	5
Future energy output -5 %			(5)	(5)
Future prices for renewable energy credits ^e +100 %			2	9
Future prices for renewable energy credits ^e from zero			(2)	(9)

^a Change in the relevant input parameter assuming all other input parameters are unchanged.^b Interest rate volatility shows the magnitude of fluctuations in interest rates over time (relative change). The larger the fluctuations, the higher the interest rate volatility.^c The spread curve shows, for the respective maturities, the difference between the interest rates payable by T-Mobile US and the interest rates on U.S. government bonds.^d Mean reversion describes the assumption that, after a change, an interest rate will revert to its average over time. The higher the selected value (mean reversion speed), the faster the interest rate will revert to its average in the measurement model.^e Renewable energy credits is the term used for U.S. emission certificates.

With a carrying amount of EUR 92 million when translated into euros, the derivatives without a hedging relationship assigned to Level 3 and carried under derivative financial liabilities relate to energy forward agreements embedded in contracts entered into by T-Mobile US. The same applies to derivative financial assets with a carrying amount of EUR 8 million when translated into euros. These agreements consist of two components: the energy forward agreement and the acquisition of renewable energy credits by T-Mobile US. The agreements were entered into with energy producers in 2017 and 2018, and will run for terms of between 12 and 20 years from the commencement of commercial operations. In the case of one energy forward agreement, commercial operations began at the end of 2017; with the others, commercial operations are set to begin between 2019 and 2020. The respective settlement period of the energy forward agreement, which is accounted for separately as a derivative, also starts when the facility begins commercial operation. Under the energy forward agreements, T-Mobile US receives variable amounts based on the facility's actual energy output and the then current energy prices, and pays fixed amounts per unit of energy generated throughout the term of the contract. The energy forward agreements are measured using valuation models because no observable market prices are available. The value of the derivatives is materially influenced by the facility's future energy output, for which T-Mobile US estimated a value of 2,207 gigawatt hours per year at the reporting date. The value of the derivatives is also significantly influenced by future energy prices, which are not observable for the period beyond five years. Further, the value of the derivatives is materially influenced by the future prices for renewable energy credits, which are also not observable. For the unobservable portion of the term, T-Mobile

US used on-peak energy prices of between EUR 22.46/MWh and EUR 69.88/MWh when translated into euros and off-peak prices of between EUR 14.10/MWh and EUR 45.29/MWh when translated into euros. An average on-peak/off-peak ratio of 52 percent was used. In our opinion, the values used constitute the best estimate in each case. If other values had been used for future energy prices, future energy output, or future prices of renewable energy credits, the fair values calculated would have been different. These hypothetical deviations (sensitivities) are shown in the table above. In the reporting period, a net expense of EUR 43 million (when translated into euros) was recognized under the Level 3 measurement in other operating income/expense for unrealized losses for the derivatives. For the development of the carrying amounts in the reporting period, please refer to the corresponding table on the left. The market-price changes in the reporting period were largely attributable to changes in observable and unobservable energy prices and to interest rate effects. Due to their distinctiveness, these instruments constitute a separate class of financial instruments. In the view of T-Mobile US, the contracts were entered into at current market conditions, and the most appropriate parameters for the unobservable inputs were used for measurement purposes. The transaction price at inception was zero in each case. Since the unobservable inputs have a material influence on the measurement of the derivatives, the respective amount resulting from initial measurement was not carried on initial recognition. Instead, these amounts are amortized in profit or loss on a straight-line basis over the period of commercial energy generation (for a total amount of EUR 11 million per year when translated into euros). This amortization adjusts the effects from measuring the derivatives in each accounting period using the respective valuation

models and updated parameters. All amounts from the measurement of the derivatives are presented in net terms per contract in the statement of financial position (derivative financial assets/liabilities) and in the income statement (other operating income/expenses). The difference yet to be amortized in the income statement developed as follows during the reporting period:

Energy forward agreements: development of the not-yet-amortized measurement amounts on initial recognition

millions of €

Measurement amounts on initial recognition	151
Measurement amounts on initial recognition (additions during the reporting period)	0
Measurement amounts amortized in profit or loss in prior periods	(3)
Measurement amounts amortized in profit or loss in the current reporting period	(1)
Currency translation adjustments	3
MEASUREMENT AMOUNTS NOT AMORTIZED AS OF MARCH 31, 2019	150

For the trade receivables, loans issued, and other receivables assigned to Level 3, which are measured either at fair value through other comprehensive income or at fair value through profit or loss, the main factor in determining fair value is the credit risk of the relevant counterparties. If the default rates applied as of the reporting date had been 1 percent higher (lower) with no change in the reference variables, the fair values of the instruments would have been 1 percent lower (higher).

The financial liabilities measured at fair value through profit or loss and assigned to Level 3 include derivative financial liabilities with a carrying amount of EUR 10 million resulting from an option granted to third parties for the purchase of shares in an associate of Deutsche Telekom. The option was granted in connection with a sale of shares in this associate, and no notable fluctuations in value are expected. Due to its distinctiveness, this instrument constitutes a separate class of financial instruments.

Disclosures on credit risk

In line with the contractual provisions, in the event of insolvency, all derivatives with a positive or negative fair value that exist with the respective counterparty are offset against each other, leaving a net receivable or liability. The net amounts are normally recalculated every bank working day and offset against each other. When the netting of the positive and negative fair values of all derivatives was positive from Deutsche Telekom's perspective, Deutsche Telekom received unrestricted cash collateral from counterparties pursuant to collateral contracts in the amount of EUR 750 million (December 31, 2018: EUR 404 million). The credit risk was thus reduced by EUR 674 million (December 31, 2018: EUR 400 million) because, on the reporting date, the collateral received was offset by corresponding net derivative positions in the same amount. On the basis of these contracts, derivatives with a positive fair value and a total carrying amount of EUR 1,124 million as of the reporting date (December 31, 2018: EUR 756 million) had a maximum credit risk of EUR 7 million as of March 31, 2019 (December 31, 2018: EUR 24 million).

When the netting of the positive and negative fair values of all derivatives was negative from Deutsche Telekom's perspective, Deutsche Telekom did not provide any cash collateral to counterparties pursuant to collateral agreements as of the reporting date (December 31, 2018: EUR 299 million).

On account of its close connection to the corresponding derivatives, the collateral received constitutes a separate class of financial liabilities. There were no other significant agreements reducing the maximum exposure to the credit risks of financial assets. The maximum exposure to credit risk of the other financial assets thus corresponds to their carrying amounts.

According to agreement, no cash collateral was provided for interest rate swaps concluded by T-Mobile US with a nominal value of EUR 8.5 billion (when translated into euros). The fair values at the reporting date were negative in each case from the perspective of T-Mobile US and amounted to EUR -626 million when translated into euros (December 31, 2018: EUR -391 million).

Please refer to the explanations above for more information on the energy forward agreements for which no collateral is provided. There is also no default risk on embedded derivatives held.

RELATED-PARTY DISCLOSURES

There were no significant changes at March 31, 2019 to the related-party disclosures reported in the consolidated financial statements as of December 31, 2018.

EXECUTIVE BODIES

Changes in the composition of the Board of Management

At its meeting on February 21, 2018, the Supervisory Board of Deutsche Telekom AG resolved to extend Timotheus Höttges' contract as Chairman of the Board of Management by five years. Timotheus Höttges was re-appointed as Chairman of the Board of Management effective January 1, 2019. Also at its meeting on February 21, 2018, the Supervisory Board of Deutsche Telekom AG resolved to appoint Dr. Christian P. Illek as Chief Financial Officer (CFO) effective January 1, 2019.

At its meeting on July 13, 2018, the Supervisory Board of Deutsche Telekom AG resolved to appoint Birgit Bohle as the new Board of Management member responsible for Human Resources and as Labor Director effective January 1, 2019. Birgit Bohle succeeded Dr. Christian P. Illek in this position.

At its meeting on September 4, 2018, the Supervisory Board of Deutsche Telekom AG resolved to appoint Thorsten Langheim as the Board of Management member responsible for USA and Group Development, a newly created Board of Management department, effective January 1, 2019.

Changes in the composition of the Supervisory Board

Shareholders' representatives. The current terms of the Supervisory Board appointments of Lars Hinrichs and Karl-Heinz Streibich ended after the shareholders' meeting on March 28, 2019. The shareholders' meeting resolved, by a majority, to elect both Supervisory Board members as shareholders' representatives in the Supervisory Board until the end of the shareholders' meeting that resolves to approve the actions of the Supervisory Board members for the 2023 financial year. The Bonn District Court's appointment of Dr. Rolf Bösing as a member of the Supervisory Board ended at the close of the shareholders' meeting on March 28, 2019. The shareholders' meeting resolved, by a majority, to elect Dr. Rolf Bösing as a shareholders' representative in the Supervisory Board until the end of the shareholders' meeting that resolves to approve the actions of the Supervisory Board members for the 2023 financial year.

EVENTS AFTER THE REPORTING PERIOD (MARCH 31, 2019)

Sale of Telekom Albania. On May 7, 2019, after the transaction was approved by the relevant authorities, OTE announced the completion of its previously announced sale of its entire stake in Telekom Albania to the Bulgarian company Albania Telecom Invest AD.

RESPONSIBILITY STATEMENT

To the best of our knowledge, and in accordance with the applicable reporting principles for interim financial reporting, the interim consolidated financial statements give a true and fair view of the assets, liabilities, financial position and profit or loss of the Group, and the interim Group management report includes a fair review of

the development and performance of the business and the position of the Group, together with a description of the material opportunities and risks associated with the expected development of the Group for the remaining months of the financial year.

REVIEW REPORT

To Deutsche Telekom AG, Bonn

We have reviewed the condensed consolidated interim financial statements – comprising the statement of financial position, the income statement, the statement of comprehensive income, the statement of changes in equity, the statement of cash flows, and selected explanatory notes – and the interim Group management report of Deutsche Telekom AG, Bonn, for the period from January 1 to March 31, 2019, which are part of the quarterly financial report pursuant to § 115 of the German Securities Trading Act (Wertpapierhandelsgesetz – WpHG). The preparation of the condensed consolidated interim financial statements in accordance with the IFRSs applicable to the interim financial reporting as adopted by the EU and to the interim Group management report in accordance with the provisions of the German Securities Trading Act applicable to interim group management reports is the responsibility of the parent company's board of management. Our responsibility is to issue a review report on the condensed consolidated interim financial statements and on the interim Group management report based on our review.

We conducted our review of the condensed consolidated interim financial statements and the interim Group management report in accordance with German generally accepted standards for the review of financial statements promulgated by the Institut der Wirtschaftsprüfer (Institute of Public Auditors in Germany) (IDW) and additionally observed the International Standards on Review Engagements, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" (ISRE 2410). Those standards require that we plan and perform the review so that we can preclude through critical evaluation, with moderate assurance, that the condensed consolidated interim financial statements have not been prepared, in all material respects, in accordance with the IFRSs applicable to interim financial reporting as adopted by the EU and that the interim Group management report has not been prepared, in all material respects, in accordance with the provisions of the German Securities Trading Act

applicable to interim group management reports. A review is limited primarily to inquiries of company personnel and analytical procedures and therefore does not provide the assurance attainable in a financial statement audit. Since, in accordance with our engagement, we have not performed a financial statement audit, we cannot express an audit opinion.

Based on our review, no matters have come to our attention that cause us to presume that the condensed consolidated interim financial statements have not been prepared, in all material respects, in accordance with the IFRSs applicable to interim financial reporting as adopted by the EU nor that the interim Group management report has not been prepared, in all material respects, in accordance with the provisions of the German Securities Trading Act applicable to interim group management reports.
